

Drug Information Service Bundle v1.0 – Release Note

Release Date: November 22, 2019

About Drug Information Service Bundle (DISB)

Drug Information Service Bundle is a software providing a set of restful services to receive information about substances, generics, and branded medicines present in the Common Drug Codes for India released by National Resource Centre for EHR Standards (NRCeS) at Centre for Development of Advanced Computing (C-DAC), Pune.

The software can be useful in receiving additional reference / knowledge about the drugs in various usage scenarios.

The DISB enables clinicians, pharmacists and researchers to find out relevant information about the medicines and substances. It can also help health IT implementors in building decision support systems that can generate alerts about adverse reactions and allergies of medication. DISB will be distributed in synchronization with Common Drug Codes for India. The salient features of DISB include:

- Ready to Deploy with minimal configuration
- Comes packaged with embedded application server
- Easy to integrate REST API with JSON response objects

DISB provides following information on various entities:

Entity Name	Details	
Substance	<ul style="list-style-type: none"> • Chemical Representations (Smiles, Iupac, Inchl, Hill Notation) • Identifiers (internationally accepted unique identifiers) 	<ul style="list-style-type: none"> • Molecular Weight • Terms and synonyms • Detailed information • Toxicity
